

System Administrator Linux (Remote)

About us

Lingate is an independent IT Service Provider from Germany. Specialized in Open Source, Lingate offers complex IT solutions and IT support. We accompany our business clients in the project planning, project management and in a successful implementation of our client's technical needs – from server and network maintenance, hosting solutions to web development and web design.

With our long-standing experience, competence and passion to Open Source, we consult companies in how to improve their businesses through IT-Infrastructure, Software Solutions and Digital Marketing.

We gather highly professional experts to create competitive advantages for our clients. If you are interested in working with a motivated team and exciting projects feel free to leave us your resume.

About the job

We are looking for a System Administrator Linux to be part of a goal driven team. You will be working with other IT-Experts to implement ideas and visions of well-known brands.

Required Skills:

- Minimum 5 years experience in Linux Administration
- Linux Distributions: Debian, Ubuntu and/or CentOS, RHEL 6 / RHEL 7
- Virtualization with KVM, Xen and/or Vmware
- Strong understanding of Continuous Integration and Continuous Delivery: Jenkins, Git (GitLab CI) or similar
- Docker, Docker Swarm, Kubernetes
Experience in planning, configuration and administration of Docker Containers and Docker Clusters
- Bash scripting
- Strong verbal and written English communication skills
- Excellent problem-solving and troubleshooting skills
- Ability to coordinate and prioritize multiple concurrent tasks

Lingate

Desired Skills:

- Automation and configuration tools: Puppet and/or Ansible
- Programming: Java, Python, Ruby, Apache Groovy
- AWS Cloud
- Confident verbal and written German communication skills

You can count on

- Member in an interdisciplinary team of highly professional developers and administrators
- Interesting tasks and motivating challenges
- Outstanding rewards for extraordinary performance
- Continuous exchange of knowledge within the team
- Continuous ongoing projects
